Claims 1-7 and 10-18 are presented for examination.

The remarks filed on April 23, 2007 have been received and entered.

Claims 1-7 and 10-18 are rejected under 35 U.S.C.103 (a) as being unpatentable over Berger (U.S. Patent 4,574,084) in view of Frangione (U.S. Patent 5,782,992) for the reasons set forth on pages 3 and 4 of the office action of January 22, 2007.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to a composition, which remains intact without degrading the chlorite compound into chlorine dioxide. The allegation is not well taken. Applicant is using the same composition as the prior art, therefore it is expected that the prior art composition would have the same characteristics as the claimed composition. Applicant also alleges criticality to the neutral PH of the claimed composition, and as a result not producing any chlorine dioxide. The allegation is not well taken considering that the prior art also uses the PH within the range of the claimed PH. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, the prior rejection sustains

In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
